FRICTION FIT SPIGOTS

CRL 2205 Duplex Stainless Steel Friction Fit Spigots come in both surface and core mount variations. The surface mount spigots feature both adjustability, to allow plumbing of the glass with ease, and a 2-piece split cover ring to further speed up the installation. Made of Duplex 2205 Stainless Steel they are both stronger and feature better corrosion resistance than 316 stainless steel. No Glass fabrication is required and the glass is firmly secured by tightening two grub screws. A garnish ring is included to conceal the fixing points.

ADJUSTABLE SIDE MOUNT FRICTION SPIGOTS

CRL Side Mount Adjustable Friction Spigots are designed to be face fixed to any surface. Perfect for balconies, staircases, landings and nib walls. They require no holes in the glass and provide easy installation with a patented adjustable feature allowing perfect alignment of glass. They are made of durable corrosion resistant 316 Grade Stainless Steel and come in brushed stainless, polished stainless and matt black finishes. Included in each box are 1 mm and 2 mm packing shims to allow for even more adjustment to uneven substrates.

SQUARE CAP RAILS

CRL Stainless Steel 25 x 21 mm Square Cap Rail can easily create a stylish glass railing system capable of accommodating 10 mm or 12 mm glass. It features a low profile design creating an unobtrusive look. Stock lengths are 5.8m and available in brushed stainless, polished stainless and matt black finishes. Corners, end caps and connectors are available and install easily with our 32629 Metal Contact Cement. Made in corrosion resistant 316L low carbon marine grade stainless steel.

STANDOFFS

CRL Standoff Kits are designed to make installation simple and cost effective for many applications. The solid body and 10mm thick tapered cap provide ultimate strength. Available in brushed stainless, polished stainless and matt black finishes. The 50 mm and 38 mm diameter assemblies feature M12 threads, a standard for many job requirements. Each standoff contains the cap, body, plastic washers and thread bush. Threaded Rod (TRM12160) and Hanger Bolts (HBM12120) are sold separately.

GLASS BRACING CLAMPS

CRL Glass Bracing Clamps are designed to provide extra stability and rigidity to glass panels. There is no need for holes in the glass, simply tighten the grub screw and you are done. Compatible with both 12 mm Monolithic and 13.52 mm Laminated glass, they are perfect for balustrades, pool fencing, shower screens, and anywhere you need support without holes in the glass. Made of Duplex 2205 stainless steel, they feature both excellent strength and superior corrosion resistance. Available in brushed stainless, polished stainless and matt black finishes.
